Description

Perfect for shady spots, Carex oshimensis 'Everlime' is a clump-forming, fine-textured Japanese Sedge with narrow, arching foliage with deep green centers flanked by lime-green margins. With its neat, flowing habit and evergreen foliage, In early summer, it bears inconspicuous brown flower spikes on long stems. Valuable for its stunning appeal and wonderful texture, this highly decorative Sedge is easy to grow, low maintenance and does well as borders and as container plants.
