

Echinacea purpurea
Sangrita
Coneflower (NATIVE)

Price : \$18.00

Price includes 6% MD sales tax

Exposure Full Sun

Height 18" - 24"

Spread 12" - 16"

Spacing 16"

Bloom Color Scarlet Red

Bloom time Summer

Deer Resistant Yes

USDA Hardiness Zone 4 - 8

Description

This SOMBRERO® Sangrita coneflower is a compact, perennial that features flame red blooms with dark cones. Its foliage is a rich dark green. This is an exceptionally short variety with prolific blooms. The showy flowers are magnets for butterflies, hummingbirds and bees and seem to hold the warmth of the sun in each pointed red petal. The small size provides a great way to bring cone flowers to the front of your border. Excellent for containers, cut flowers, dried flowers, mass planting and as a focal point in the garden. Leave some spent blooms on the plants in the fall because their seeds provide winter food for finches and other birds. The dried seed heads also provide architectural interest in the winter.
