**Other** shiny dark green leaves, 2-3" waxy, double white fragrant flowers.

## Description

A beautiful evergreen shrub that features classic large, double, sweetly fragrant, ivory white gardenia flowers and waxy, dark green foliage. It is cold tolerant. A nicely rounded form, useful as a low hedge or screen, or as an accent for entryways. The fragrance will waft in warm summer conditions. Lovely and bird friendly. Attracts hummingbird moths. Excellent in containers. Re-sprouts from the base if frozen.
