

Hakonechloa macra

Lemon Zest

Japanese Forest Grass

Price : \$23.00

Price includes 6% MD sales tax

Exposure Part Sun, Full Shade

Height 12" - 14"

Spread 12" - 24"

Spacing 18"

Bloom Color Tan

Bloom time Summer

Deer Resistant Yes

USDA Hardiness Zone 6 - 9

Description

Grown for its eye-catching foliage, this ornamental grass is long lived, tough and unlike most grasses, loves moist shady conditions. Hakonechloa macra 'Lemon Zest' (Hakone Grass) is a golden grass that literally glows in the shade. Lemon Zest is considered one of the lightest and brightest, brightening shady spaces with its brilliant chartreuse color and lemony yellow and ivory white variegation. Delicate looking, reddish-brown flower spikes appear in late summer, but are generally unnoticed among the leaves. Best divided in spring. Though this grass does spread by rhizomes, it is a slow grower and it will not be necessary to divide this grass for many years. It is also a great bed, border, or container plant.
