Bloom Time Mid Summer

Deer resistant No

USDA Hardiness Zone 5-9

Other Deciduous, with white blooms changing to rosy pink, winter interest, showy; Dark green foliage turns deep red-bronze in fall.

Description

Hydrangea quercifolia, commonly called oakleaf hydrangea, is an upright, multi-stemmed, deciduous shrub. Robust flower clusters open white and age to pink, remaining upright even after heavy rain. Flowers remain colorful and attractive through frost. Dark green, deeply lobed oak-like foliage turns brilliant deep red-bronze in fall. Well-suited for smaller landscapes, in groups, or as a hedge. Blooms on old wood. Prune if needed immediately after flowering. Deciduous.
