Description

'Sensational' Lavender is an improved, easy-to-grow variety that makes growing lavender accessible to more gardeners than ever! Silvery foliage is topped by large, dense purple flower spikes. With a compact, dense habit and notable durability for sun, heat, and humidity, as well as cold tolerance, Sensational stands apart from many traditional Lavender varieties. The strong stems are great for bouquet building. Sensational has all the landscaping capabilities of a great lavender—heat, humidity and cold tolerance. A favorite of honeybees, these fragrant flowers will attract a wide range of pollinators.
